 **CINEMAMAKEUPSCHOOL**

# CINEMA MAKEUP SCHOOL

is wholly dedicated to educating the next generation of beauty and special effects makeup artists for career success in the film, television, fashion, and entertainment industries.

## PROGRAMS

CMS offers five diploma courses which bundle a variety of classes enabling students to choose a path that best suits their individual career goals.

### COMPLETE TRACK

This track includes every course offered at CMS, which gives students a thorough and well-rounded educational experience that will prepare them for employment in the film, television, fashion, and entertainment industries.

### FX TRACK

The FX Track offers Cinema Makeup School's full Master Makeup Program as well as a set of specifically chosen concept and advanced courses that exclusively focus on lab technician skills and processes.

### MASTER MAKEUP PROGRAM

This curriculum gives students a full overview of the industry in 18 weeks, covering beauty through special effects, including application and lab technician skill sets.

### HIGH FASHION PHOTOGRAPHIC PROGRAM

All of the skills needed to work in the fashion industry as a makeup artist and stylist are covered in this program. It examines techniques used in magazines, fashion shows, video shoots, and private client services.

### CREATURE CONCEPT DESIGN PROGRAM

This program focuses on developing students' approach to special effects through other mediums such as digital painting, 3D sculpting, and traditional clay.

## COURSES

CMS offers shorter concept courses which can be taken either as additions to a program of study or on their own. Certifications are given for each course completion.

### CHARACTER MAKEUP

Out-of-kit techniques that cover how to apply injury simulation, bald caps, facial hair, and old age makeups.

### PROSTHETIC MAKEUP

In this four-week course students learn the complete technical process, from concept to final application of realistic prosthetic makeup.

### SPECIAL EFFECTS MAKEUP

This is a lab techniques class that teaches the creation and application of multi-piece prosthetics, lifecasting, molding, and realistic denture design.

### ADVANCED LAB TECHNIQUES

In this course, students will create a highly-realistic severed head prop using industry standard materials and

techniques, such as fiberglass mold making, silicone casting and painting, creating realistic eyes, and hair punching.

### ADVANCED BEAUTY THEORY

This three-week course is designed for seasoned beauty makeup artists who want to elevate their craft and learn niche techniques.

## CAREER PATHS

Cinema Makeup School offers a complete education applicable to many areas, but we focus on getting our students working in one of two major paths: on set or in the shop.

**Application-focused** students, upon program completion, will be qualified to pursue a career in film, day-time TV, night-time TV, and commercial work. Students can also work as a personal stylist for the stars, in high fashion, and the music industry. This path revolves around on-set makeup application, working directly with clients based on productions, and creating looks for any type of camera and lighting on and off screen.

**Shop-focused** students, upon program completion, will have the necessary skills to fill a wide variety of the roles that comprise a professional special effects lab. Technicians can pursue jobs in concept design, sculpture, mold making, painting, or choose to focus on creating eyes, teeth, props, or numerous other creatively-specialized positions available in a shop environment.
